

## Invitation to the 2<sup>nd</sup> FutMon Water Budgets Workshop

Date: 18<sup>th</sup> November 2010

Location: Bavarian State Institute of Forestry  
Hans-Carl-von-Carlowitz-Platz 1  
D-85354 Freising, Germany

### Background:

The FutMon C1-Met-29(BY) action focuses on the development and implementation of water budget modelling on intensive monitoring plots. The focus of interest in this action is the reaction of trees on drought stress, which may occur as a consequence of climate change and the consolidation of knowledge in nutrient uptake and growth.

The first step in this action is to compare and validate the performance of different water budget models on diverse forest monitoring plots in Europe in order to be able to give a recommendation for a calculation of standardized water budget parameters on European intensive monitoring plots.

During the workshop, the validation results of the water budget model comparison will be presented and discussed. The workshop will be a forum for the exchange of experiences concerning water budget model application and proper model calibration techniques.

You are kindly invited to participate.

Please fill up the attached registration form as soon as possible (latest before October, 22<sup>th</sup> 2010).
